Virtual Machine 100 (cindy xp) on node 'cindy'

XAMPP Control Panel v3.2.2

Windows Firewall has blocked some features of this program

Windows Firewall has blocked some features of myappid on all public and private networks.

Allow myappid to communicate on these networks:

☒ Private networks, such as my home or work network

☐ Public networks, such as those in airports and coffee shops (not recommended because these networks often have little or no security)

What are the risks of allowing a program through a firewall?

Allow access Cancel
